

BATTLE OF MARIANNA

By
Mrs. F. B. Chapman

ere, the flooring of the bridge. The col-
onel having been captured by his
horse falling, we had no lead—every
officer was a leader of his own com-
pany. Of course there was some con-
certed action, but as a general thing
it was a free lance for all.

Silently Marched Away.
"When the picket firing ceased it
was supposed they had gone to some
other point to make a crossing of
Chipola river, but instead they had
learned that the governor had ordered
Scott's battalion to hasten to the
scene of action, and so had silently
marched away in the night. We did
not know what had happened in the
town except that houses were being
burned. I did not know that my father
was wounded and that sixty-five
of our own people had been carried
away prisoners, until Wednesday
morning.

Capt. Gaeter proposed to be one of
the party to cross the timbers of the
bridge and see. This was done and
was sent back that the town
was evacuated. The bridge was has-
tily again, and soon Scott's bat-
talion was here and he with the
ready on hand pursued to
Washington, but too late to over-
take the fleeing foe. When I came
home my father was a widow, and
I had many long and

boys, if you were in my place,
you send him that paper? I
I shall, but he don't deserve it.

A Hearty Appetite
That most babies have, but is of no
benefit to them if they have worms.
Be sure your baby is not troubled
with them. Sure symptoms—always
hungry, rings under the eyes, not
gaining in weight and yellow com-
plexion. A few doses of White's Cream
Vermifuge will expel all worms. It is
a positive cure and reliable. Price 25
cents per bottle.

THE BLOUNT BUILDING

Recently Purchased By F. C. Brent From Wm. H. Knowles For \$300,000.00.

WHAT TO GIVE

TO THE WIFE:

If your home is not lighted by electricity already, give her a contract
which you have signed for modern, cool, safe lighting of the house—elec-
tric lighting. She will remember it when she takes comfort reading after
each day is done. If you had her work or worry over the filling of kero-
sene lamps, or replacing mantles every morning, you would think elec-
tricity was a pretty good sort of Christmas present!

TO THE HUSBAND:

An electric shaving mug that will produce hot shaving water in a
minute or two, that also will keep the memory of Christmas alive through
every morning of the year.

TO THE SISTER:

An electric chafing dish. Would she have a good time with it? Think
of the ease with which she could entertain her young friends. And, by the
way, do you know how simple it is to get a breakfast or supper on one
of those things? The whole household shares in that present!

TO THE BROTHER:

An electric fan for his room, or his office, or his den. It will not go
into his stocking, but try to think of something that will, which he would
want more.

TO THE AUNT:

A sewing machine motor. No woman ought to work herself tired on
the tread of a sewing machine. Ask the family doctor. Here is a merci-
ful present to any woman. It would be a gift with a lot of common sense
chivalry.

TO THE BABY:

An electrical hot water heater. He will need it on many occasions
when milk must be warmed in a hurry and there is no fire in the store.
In a dozen ways it will save his mother trouble. That would be a present
with the real Christmas spirit in it.

TO THE MOTHER:

An electric curling iron. Do women appreciate these little luxuries?
Would she?

TO THE FATHER:

An electric toaster. Does he like his toast crisp in the morning?
Some one invented the expression, "hot as toast." Most toast is cold—
damp and cold. Not the electric made toast.

These are just suggestions. Most persons think these things cost a lot of money. NO.

Most persons think they use a lot of current. NO.

"Let us go down to the Electric Company's office and see what we can do about Christmas."
